What values do you find most valuable to your work?
33 responses

What responsible -practices- are already considered in your projects?

Asking multiple people to try the experience

Keeping everyone informed and motivated.

Stakeholder engagement

Design for your audience not yourself

Tryouts with target audience

Lot of contact with stakeholders

internal discussion on ethics

Check with students about what they are comfortable with to share during an XR experience.

What responsible -practices- are already considered in your projects?

Learning students to experiment through prototyping, but be aware of the choices

Test for bugs as well as for usability

Open-source software

Ethics committee

Finding the "truth" about using technology and what is the impact of it

Consider color blindness (inclusivity)

Coaching students with different perspectives

Safety, meerwaarde, is iets te meten in xr dat niet anders mogelijk is

What responsible -practices- are already considered in your projects?

What right does tech have to replace humans

Data & privacy security.
Good content & good guidance of the content.
Awareness of ethics

Asking colleagues for their needs

Try to support multiple platforms where possible

Create for longevity

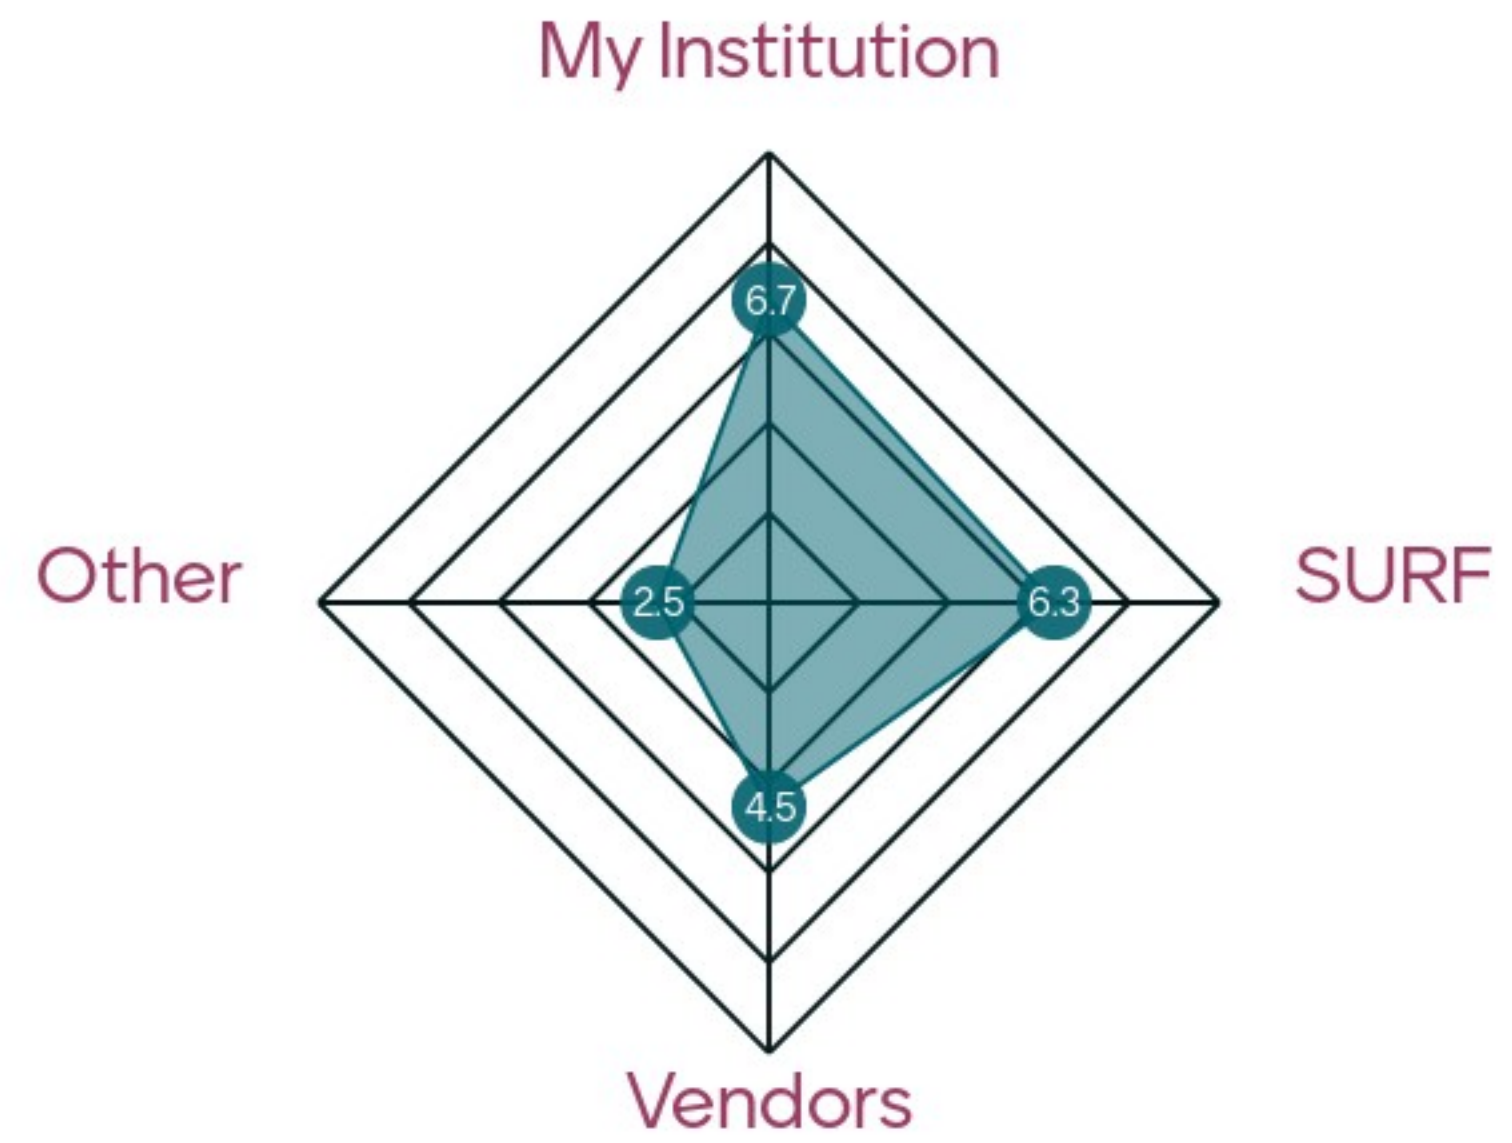

Human resource management

What is the most important public value?

Who do you feel should be leading public values?

How often do public values come up in your projects?

What do you need to get them included?
